U.S.S.R. COMPUTATIONAL MATHEMATICS AND MATHEMATICAL PHYSICS

Cover-to-cover translation of
Zhurnal vychislitel'noi matematiki i matematicheskoi fiziki
Published bi-monthly by Pergamon Press

HONORARY EDITORIAL ADVISORY BOARD

R. A. BROOKER (*Manchester*)
L. FOX (*Oxford*)
D. C. GILLES (*Glasgow*)
A. S. HOUSEHOLDER (*Oak Ridge*)
G. F. J. TEMPLE (*Oxford*)
A. THOM (*Oxford*)
J. H. WILKINSON (*N.P.L., Teddington*)

Scientific Translation Editor:
R. C. Glass, M.A., M.Sc.,
The City University, St. John Street, London, E.C.1.

Translators: J. Berry and D. E. Brown

Publishing and Advertising Office:
Pergamon Press Ltd., Headington Hill Hall, Oxford, OX3 0BW

Subscription Rates
1981 *Subscription rate* $500.00 (*including postage and insurance*)
Two year rate (1981/1982) $950.00
Subscriptions are only serviced after payment has been received and are not accepted for less than one year.

Subscription enquiries from customers in America should be sent to: Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, *U.S.A., and for the remainder of the world to: Pergamon Press Ltd., Headington Hill Hall, Oxford OX*3 0*BW, U.K.*

Microform Subscriptions and Back Issues
Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche.
Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

LIST OF CONTENTS

Number 1

V. S. KHACHATRYAN	1	A method of solving large systems of non-linear algebraic equations of special structure
V. V. VASIN	8	Discrete convergence and finite-dimensional approximation of regularizing algorithms
T. I. SAVELOVA	20	Regularization of non-linear integral equations of the convolution type
K. K. SABEL'FEL'D	27	Approximate evaluation of Wiener continual integrals by the Monte Carlo method
A. V. LOTOV	44	Convergence of methods of numerical approximation of the sets of attainability for linear differential systems with convex phase constraints
G. D. MAISTROVSKII	57	A gradient method for the modified Lagrange function
B. T. POLYAK	72	Methods for solving constrained extremum problems in the presence of random noise
V. A. PIR'YANOVICH	81	Computer experiments on solving integer linear programming problems by locally stochastic algorithms
V. M. PANIN	90	A second-order method for the discrete min-max problem
S. F. MOROZOV and V. I. SUMIN	101	Optimization of the non-linear systems of transport theory
I. I. EREMIN	114	Standard iterative processes of unsmooth optimization for non-stationary problems of convex programming—II
A. N. ZAVORIN	125	Stable iterative realization of some implicit methods of integration
L. I. KAMYNIN and B. N. KHIMCHENKO	133	A strong extremum principle for weakly elliptically connected second-order operators
N. A. STRELKOV	147	Iterative methods for solving linear and quasilinear projection-difference analogs of fourth-order boundary-value problems
N. S. GRIGOR'EVA	161	Asymptotic expansions of the modified wave functions of an oblate spheroid
N. E. ANDREEV, V. P. SILIN and G. L. STENCHIKOV	170	A numerical method for solving Vlasov's system of equations, based on a combination of the particles in a cell and the "water bag" methods
V. M. KOVENYA and N. N. YANENKO	178	A moving-grids difference scheme for solving the equations of a viscous gas
S. M. SHVARTIN	193	On cyclic sets
V. V. KRASNOPROSHIN	209	An optimal corrector for a set of recognition algorithms
N. R. PAVLIASHVILI	221	An approach to the solution of pattern recognition problems
		Short Communications
N. P. SALIKHOV	227	On the convergence of Seidel's method for solving a system of linear algebraic equations
A. F. ZABLOTSKAYA	233	Asymptotic behaviour of the s-dimensional optimal gradient method in Hilbert space
I. N. MELESHKO	239	Approximate evaluation of Cauchy type repeated integrals and their principal values
YU. A. PETROV and I. M. SOLOL	246	The use of similar trajectories in Monte Carlo computations
I. A. ANTONOV and V. M. SALEEV	252	An economic method of computing LP_τ- sequences
A. I. TKACHENKO	256	Some possibilities for the reduction of rounding errors in the integration of ordinary differential equations
V. V. SMELOV	259	The unique formation of conditions on the interior and exterior boundaries of the domain in the P_{2N+1}-approximation of the method of spherical harmonics
A. P. BYRKIN and V. V. SHCHENNIKOV	264	Calculation of subsonic viscous gas flows in plane channels and wakes

Vol. 19 1979

A. A. Charakhch'yan — 272 A version of the completely conservative scheme for the gasdynamic equations

Scientific Information

277 Letter to the Editor

277 Book Review

Number 2

1 Aleksandr Andreevich Samarskii celebrates his sixtieth birthday

A. M. Fedotov — 3 Some inequalities for the errors of approximate solutions of operator equations

V. K. Gorbunov — 18 A method for the parametrization of optimal control problems

Chan Han — 31 Some methods of unconstrained minimization

V. R. Nosov and V. D. Furasov — 44 Stability of discrete processes with respect to specified variables, and the convergence of some optimization algorithms

S. K. Zavriev — 58 Hybrid penalty and stochastic gradient method for seeking a max-min

V. I. Tsurkov — 73 A method of decomposition based on aggregation in block programming

Yu. M. Ermol'ev and Yu. M. Kaniovskii — 87 Asymptotic properties of some fixed-step methods of stochastic programming

I. I. Grachev and Yu. G. Evtushenko — 99 A library of programs for solving optimal control problems

A. S. Sipin — 119 Solution of two Dirichlet boundary value problems by the Monte Carlo method

V. G. Korneev — 134 Mesh operators energy-wise equivalent to operators generated by piecewise Hermitian extensions

S. I. Kabanikhin — 150 A finite-difference method of finding the coefficients of a hyperbolic equation

A. S. Il'inskii and O. B. Popov — 159 On the direct method in problems of diffraction by smooth infinite wavy surfaces in inhomogeneous media

Yu. I. Mokin — 178 The conditions for convergence of the particles-in-a-cell and stream tube methods

I. F. Potapenko and V. A. Chuyanov — 192 Completely conservative difference schemes for a system of Landau equations

O. M. Belotserkovskii and V. Ya. Mitnitskii — 199 Some exact solutions of the problem of a magnetic dipole surrounded by an infinitely-conducting fluid

V. I. Myshenkov — 210 Calculation of the viscous laminar supersonic jet flow in a slipstream

M. D. Kremenetskii, N. V. Leont'eva and F. D. Popov — 221 Numerical solution of the problem of spatial flow in turbomachines

N. A. Koltovoi — 231 On the completeness of the linear space of recognition operators for the calculation of estimates and potential function types

Short Communications

V. S. Kozyakin and M. A. Krasnosel'skii — 244 Some problems connected with the method of minimal residuals

G. A. Mikhailov — 247 Estimation of the difficulty of simulating the process of "random walk on spheres" for some types of regions

K. R. Aida-Zade — 255 A polar coordinate method for the minimization of functions with a ravined structure

Dzh. A. Babaev, G. P. Veliev and K. Sh. Mamedov — 260 The *a priori* determination of optimal variable values in discrete programming problems

I. B. Vapnyarskii — 265 Modular problems of the mathematical theory of standardization

A. D. Khalezov — 271 An approximate computation of an optimal strategy in games with a fixed sequence of moves with incomplete information

E. G. Shifrin and G. V. Shubnikov — 278 A numerical experiment on the solution of Neumann's problem and a problem with an inclined derivative when the solvability conditions are not satisfied

V. V. Demchenko — 286 A comparative investigation of some hydrodynamic compression processes

S. P. Popov and Yu. I. Romashkevich — 293 An algorithm for calculating two-dimensional non-equilibrium gas flows

298 Book Reviews

Number 3

Vol. 19 1979

D. Yu. Grigor'ev — 1 The algebraic complexity of computing a family of bilinear forms

V. I. Solodovnikov — 21 Extension of Strassen's estimate to the solution of arbitrary systems of linear equations

A. V. Baev — 33 Construction of a normal solution of non-linear ill-posed problems by the method of regularization

V. N. Malozemov — 41 The synthesis of a multi-band electric filter

M. M. Potapov — 51 Approximation with respect to a functional of maximin problems with connected variables

E. Pfeifer — 64 Discrete convergence of multi-step methods in eigenvalue problems for ordinary second-order differential equations

A. A. Bykov and A. S. Il'inskii — 74 Solution of boundary value problems for linear systems of ordinary differential equations by the method of directed orthogonalization

G. I. Shishkin — 82 Mesh method for solving elliptic equations with discontinuous boundary conditions

P. N. Vabishchevich and S. A. Gabov — 95 Angular potential for solving an elliptic equation with variable coefficients

Yu. I. Mokin — 109 The convergence and accuracy of the method of macroparticles

V. P. Polityukov — 120 A method of solving boundary value problems for non-linear transport equations

A. V. Lapin — 135 Investigation of some non-linear problems of filtering theory

O. V. Titov — 149 Theorems of the existence of a solution for the self-similar boundary value problem of a viscous hypersonic shock layer

V. F. Baklanovskaya, B. V. Pal'tsev and I. I. Chechel — 157 Boundary value problems for the St. Venant system of equations on a plane

Yu. I. Zhuravlëv and I. V. Isaev — 175 Construction of recognition algorithms correct for a given control sample

S. M. Avdoshin and V. V. Belov — 189 A generalized "wave" method for solving extremal problems on graphs

Short Communications

S. A. ABRAMOV 207 Some estimates connected with Euclid's algorithm

FAM KI AN 213 Projective-iterative methods of solving operator equations

A. A. CHARAKHCH'YAN 220 A relation between the products of orthogonal polynomials

V. B. GLASKO, N. N. KULIK, A. N. TIKHONOV and I. N. SHKLYAROV 223 An inverse problem of heat conduction

N. A. MAGNITSKII 231 Asymptotic behaviour of the solutions of differential equations with a small parameter in Banach space

A. P. CHERENKOV 234 The integral problem of the distribution of resources

O. I. CHUSHKIN 239 The leading edge of a body with a channel, flying at supersonic speed

M. A. ROMANOV 245 Extremal recognition algorithms using the potential function method

A. N. VINOGRADOV 248 A theorem on the local rank of one-place predicates

Scientific Information

252 New books on mathematics

Number 4

J. GERGELY 1 Matrix inversion and the solution of systems of linear and non-linear equations by the method of bordering

G. S. GANSHIN 10 Optimization of algorithms in mesh classes

V. N. TRUSHNIKOV 22 A non-linear regularizing algorithm and some of its applications

T. I. SAVELOVA 31 On the stable summation of Fourier series

A. I. PAVLOV and B. B. POKHODZEI 38 Pseudo-random numbers generated by linear recurrence relations over a finite field

A. A. LEVIKOV 44 The limiting properties of a dynamic system with convex constraints

A. K. KERIMOV 53 Galerkin approximation of optimal control problems for parabolic systems with distributed parameters

V. G. LITVINOV 70 Optimal control of the natural frequency of a plate of variable thickness

A. I. SAMYLOVSKII and B. G. SUSHKOV 86 Piecewise linear approximation of a non-convex set by a polyhedron

M. A. SHEPILOV 97 The penalty method for problems of convex programming

N. S. KUKUSHKIN 106 Non-cooperative three-person games with fixed hierarchical structure

A. A. SHANANIN 122 Dynamic games with hierarchical vector of interests

L. T. POZNYAK 132 A method of estimating lower bounds for eigenvalues of differential operators by the method of fictitious domains

V. G. KORNEEV 149 Schemes of the finite element method of high orders of accuracy for second-order elliptic equations in three-dimensional regions—I

L. G. STRAKHOVSKAYA and R. P. FEDORENKO 162 A version of the finite element method

K. K. SABEL'FEL'D 173 The Monte Carlo solution of a boundary value problem for the metaharmonic equation

N. A. MAGNITSKII 182 Volterra linear integral equations of the first and third kinds

V. P. GORELOV and V. I. IL'IN 201 On the solution of the integral equations of radiative transport

E. P. Zhidkov, M. Nguen, I. P. Nedyalkov and B. N. Khoromskii — 210 Investigation of a class of solutions of the Low equation

N. N. Yolkin — 228 The existence and uniqueness of the solution of boundary value problems in the theory of long waves on the surface of a rotating liquid

Z. A. Smol'yaninova — 237 Correct algorithms in the algebraic closure of a family of recognition algorithms with a special kind of information teaching

Short Communications

F. Sharipkhodzhaeva — 248 Cubature formulas of the 9-th and 10-th degrees of accuracy for a sphere of n-dimensional space

V. N. Mizgailov, V. V. Mukhin and V. A. Romanov — 252 On the optimal statistical regularization of operator equations with a constraint on the norm of the solution

A. B. Bakushinskii — 256 On the principle of iterative regularization

Yu. Ya. Ledyankin — 260 An increment method for the solution of the equation $Ay = f$

A. G. Zarubin — 265 The speed of convergence of projection methods for linear equations

F. P. Vasil'ev, M. A. Vorontsov and O. A. Litvinova — 272 On the optimal control of the process of thermal blooming

J. G. Mitev — 279 The use of the number of permissible solutions of the algorithmic equations for the purely integer linear programming problem

G. V. Dumkina and M. Yu. Kozmanov — 282 The exact solution of the non-linear system of equations for the energy and non-stationary radiation transfer

Yu. I. Lovanovskii — 285 On the monotonization of finite-difference solutions for shock-capturing methods

M. D. Taran and A. P. Favorskii — 291 Numerical solution of the two-dimensional heat-conduction equation with strongly varying coefficients

297 Book Reviews

Vol. 19 1979

Number 5

S. M. Knopova and T. I. Savelova — 1 The use of projection methods to solve unstable problems

E. D. Viktorov — 8 The convergence of a procedure for calculating an approximate solution in the generalized Kantorovich method

A. I. Mikhal'skii — 18 Restoration of statistical dependences by averaged splines

V. S. Godlevskii and A. N. Zavarin — 28 The use of non-parametric estimates for evaluating multi-dimensional integrals

B. N. Pshenichnyi and N. N. Redkovskii — 38 Some methods of unconstrained minimization

I. T. Skorodinskii — 46 The necessary condition for optimality of singular controls

V. G. Korneev — 54 High-order schemes of the finite elements method for second-order elliptic equations in three-dimensional domains—II

A. V. Dzhishkariani — 61 The solution of singular integral equations by approximate projection methods

P. N. Vabishchevich, S. A. Gabov and P. V. Shevtsov — 75 The angular potential for the operator $\Delta + c(x)$

S. A. Kuchai and R. P. Tarasov — 92 Approximate solution of the direct and converse problems of the propagation of a disturbance in a guiding medium

V. F. Apel'tsin	102	Justification of the projection method for solving axisymmetric problems of diffraction by locally inhomogeneous bodies
V. I. Dymchenko	119	Asymptotic expansions of solutions of the Helmholtz equation in the neighbourhood of boundary corner points
N. S. Grigor'eva	131	Asymptotic behaviour of quasi-eigenvalues of the Laplace operator in the case of the outside of a circular disc
N. A. Bakhvalov, E. P. Zhidkov, E. P. Kadantseva, S. B. Rubin and S. I. Serdyukova	142	The numerical solution of a model selfconsistent electrodynamic problem
L. G. Strakhovskaya and R. P. Fedorenko	151	Methods of calculating some quasi-stationary modes of operation of a nuclear reactor
A. G. Kosovichev and Yu. P. Popov	168	The computation of one-dimensional non-stationary problems of gravitational gas dynamics
M. I. Volchinskaya and B. N. Chetverushkin	176	The solution of two-dimensional non-stationary problems of radiation gas dynamics
V. V. Aristov and E. M. Shakhov	190	The problem of an intense explosion in a rarefied gas
A. D. Gadzhiev and V. N. Pisarev	202	"Romb": an implicit finite-difference method for the numerical solution of the equations of gas-dynamics with heat conduction
G. N. Pyatnitskaya and I. G. Sinitsyn	219	One-way infinite sequences in a graph and the optimal allocation of identical figures in an infinite narrow strip
		Short Communications
V. V. Voevodin	228	On methods of conjugate direction
S. M. Bersenev	234	The recomputation of Holessky factorization
V. M. Zhuravlëva	236	Solution of a system of linear algebraic equations with an asymmetric matrix using a biorthogonal algorithm
V. D. Efros	239	On the "linearization" of the products of classical orthogonal polynomials
B. B. Pokhodzei	245	A compound method of modelling a Poisson distribution
I. E. Shparlinskii	249	On a completely uniform distribution
D. S. Lebedev and A. V. Trushkin	253	Solution of a system of linear equations with an incomplete circulant matrix by a discrete Fourier transformation
A. G. Korotchenko	258	The search for the minima of several unimodal functions
N. N. Aksenov and V. Ya. Gol'din	263	Computation of the two-dimensional stationary equation of neutron transfer by the quasi-diffusion method
E. V. Zakharov and Yu. A. Eremin	267	A method of solving axisymmetric problems of the diffraction of electromagnetic waves by bodies of revolution
Z. A. Smol'yaninova	272	Stability of the correct recognition algorithm with a special form of the teaching information
	276	Book Reviews

Number 6

A. S. Leonov	1	Choice of regularization parameter for non-linear ill-posed problems with approximately specified operator
A. Yu. Afanas'ev, V. A. Novikov and I. I. Prosvirnin	16	Storage and use of information when seeking minimum and root of functions of one argument
M. B. Shchepakin	26	Modification of a class of mathematical programming algorithms
V. I. Tsurkov	35	Decomposition in a classical variational calculus
A. A. Lyubushin	53	Modifications and convergence of successive approximations for optimal control problems
N. I. Ringo	62	Prediction of the behaviour of processes with imperfectly known control
V. V. Podinovskii	77	The principle of guaranteed result for partial preference relations
V. A Galaktionov, S. P. Kurdyumov, A. P. Mikhailov and A. A. Samarskii	91	An approach to the comparison of solutions of parabolic equations
P. N. Vabishchevich, V. B. Glasko and Yu. A. Kriksin	103	Solution of the Hadamard problem by a Tikhonov-regularizing algorithm
V. F. Baklanovskaya	112	Comparison of exact and approximate solutions of a parabolic system of equations with degeneracy
Yu. I. Mokin	127	Some algorithmic features of the determination of relativistic electron trajectories in a self-consistent electromagnetic field
A. N. Bogolyubov and A. G. Sveshnikov	139	Justification of a finite-difference method for analyzing optical waveguides
V. V. Kravtsov and V. I. Priklonskii	150	Solution of the three-dimensional problem of the diffraction of electromagnetic waves using antenna potentials
G. E. Repina and B. N. Chetverushkin	158	A method of solving radiation transfer equations in two-dimensional problems of radiative gas dynamics
B. K. Novosadov	166	The exact evaluation of multicentre molecular integrals over hydrogen-like atomic orbitals
G. P. Tonoyan	179	The successive splitting of vertices of an n-dimensional unit cube into chains and decoding problems of monotonic Boolean functions
A. I. Zelichenko	192	The correspondence of monotonic Boolean functions to systems of linear inequalities
A. A. Ivanov and S. V. Il'inskii	205	Correct algebras over classes of algorithms for the computation of k-valued properties
Yu. A. Zuev	217	A set-covering problem: the combinatorial approach and the branch and bound method
S. I. Kashkevich and V. V. Krasnoproshin	227	A two-level automated pattern recognition complex

Short Communications

A. V. Burov	239	Solution of the generalized eigenvalue problem $(A - \lambda B)x = 0$ by the QZ-algorithm
G. V. Alekseev	243	On the incorrectness of the non-linear operator equation of the first kind in antenna synthesis theory
B. P. Pucachev	250	Application of the continuation method to the solution of non-linear boundary value problems

Vol. 19 1979

V. S. ANTYUFEEV — 253 The mathematical expectation method for solving radiative transfer problems with plane geometry

V. P. GERDT — 257 Analytic calculation of the invariant curve of the Chew–Low equations

P. A. VOINOVICH, A. I. ZHMAKIN, F. D. POPOV and A. A. FURSENKO — 266 Numerical study of complex shocked gas flows
